**LUCY, the cyber awareness product,
makes simulated Internet attacks
available and affordable for all!**

What is LUCY?

The LUCY Phishing Awareness Training Server is designed to simulate social engineering attacks. It is universally applicable—from SMEs right up to very large corporations. Available on-premise or as a cloud solution, LUCY is easy to learn and intuitive to navigate. This Swiss solution provides dozens of pre-configured, easily customizable phishing templates and training modules, which can be independently set up by the end user. With LUCY's mail plugin, users rapidly send and receive security alerts whenever a phishing attack is detected. This feature speeds up security team responses whilst reducing workload and costs. The LUCY solution is already utilized in more than 10,000 licenses in over 60 countries. LUCY has an international channel of certified "Eco System Partners" in 14 countries, which complements the LUCY offering with a bundle of value-added services.

LUCY is the most powerful, the most reliable, and the most efficient product in the market!

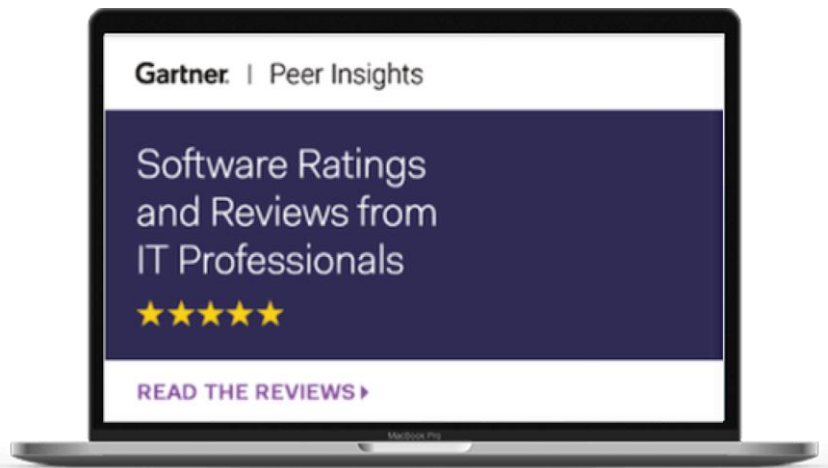

Lucas Lomax

Easy to implement, very extensive toolkit. Self-explanatory GUI, very reasonable pricing!

PRODUCT FEATURES LUCY keeps YOUR staff vigilant against cyber threats

ATTACK FEATURES

- Phishing simulations
- 800+ Attack templates
- Ransomware simulations
- Portable media attacks (USB, CD, etc.)
- Smishing simulations
- Malware simulations (Office macros, Java, etc.)
- File-based attacks (PDF, Audio, etc.)
- Spoofing attacks (Website Cloner, SMS- & Mail-spoofing)

TRAINING FEATURES

- 300+ WBT training modules
- Role- and reputation-based training
- End user training portal access
- E-Learning education diploma
- Measure training success
- E-Learning content authoring toolkit
- Static training library
- Off-site support
- Video customization options
- Training content SCORM

MAIL PLUGIN FEATURES

- Report emails with a single click
- Deep inspection request
- Automatic incident analysis
- Incident auto feedback
- Threat mitigation
- Custom rule-based analysis
- Plugin customization options
- Third party integration
- Identify attacks with common patterns
- Incident user reputation profiles

To successfully defend against a cyber-attack, a company needs to simultaneously secure both people and systems and to allow them to evolve together as a single unit. Making sure that employees are working effectively with the security system, and that they remain vigilant against cyber-threats, requires continual education and testing. Lucy is very affordable and requires minimal training, setup, and effort. LUCY's fixed-price model delivers a tremendous ROI to all clients!

Palo Stacho, Co-Founder

AWARDED MANY TIMES

Cyber Security Excellence Award for Best "Security Education Platform"

Cyber Security Excellence Award for Best "Security Education"

"Preferred Phishing Simulation" in Hacking for Dummies

Cyber Security Excellence Award for Best "Anti Phishing"
